

Introduction

Two of the UK's leading FASD experts have made a book for other doctors about FASD.

Prof Raja Mukherjee is a psychiatrist. He runs the National Clinic for FASD. He helps people learn if they have FASD.

Dr Neil Aiton is a neonatologist. He helps newborn babies who were exposed to alcohol in the womb before they were born.

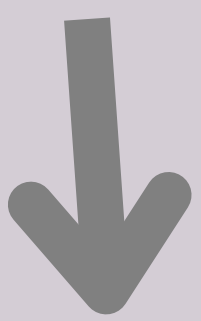

Raja and Neil know not everyone can read or buy their book. In this online book club chapter authors will talk about what they wrote in the book.

#1

In this first book club Raja and Neil talked about how they made the book and how they decided about the chapters.

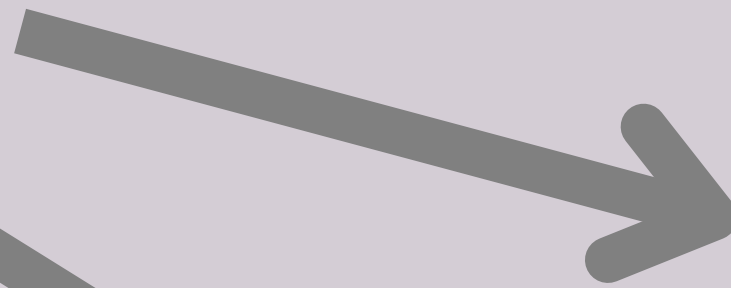

They talked about the topics in the book

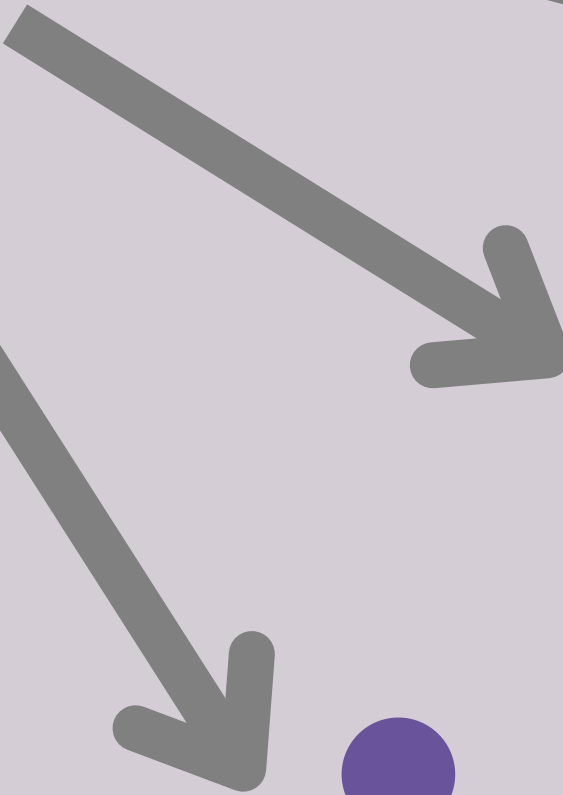

Diagnosis

Alcohol-free pregnancy

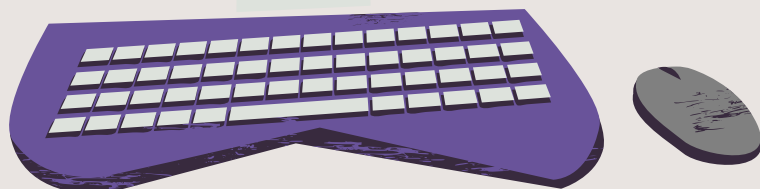

Support

Stories from people who live with FASD

Policy

Future book club sessions will talk more about the topics. The videos will be shared on National FASD's YouTube.
